INTRODUCTION

Your Tocwatch has a highly accurate quartz mechanism, with the added function of RCC – Radio Controlled Clock. The RCC feature automatically synchronises your watch with the UK atomic clock (NPL), every 24 hours, using the UK atomic clock long wave radio signal. This gives you confidence your TocWATCH® always shows accurate time, as well as adjusting for British summer and winter time.

IMPORTANT! BEFORE YOU START

**To activate your NEW TocWATCH® you must synchronize the watch to the NPL radio signal.**

To do this simply hold button C for 5 seconds and place close to a window which allows for the best signal reception.

If the Watch is too close to electrical appliances such as TV's, mobile phones and computers, this may cause undesirable signal interference. A strong signal is normally found close to the window.

OPERATING INSTRUCTION

- Press button A to cycle through the watch functions.

Time ⟶ Alarm ⟶ Stopwatch

⟶ Countdown ⟶ World Clock ⟶ (back to Time)

SETTING YOUR LOCAL TIME ZONE

When displaying the time, hold button B for 3 seconds until the city code flashes, press button D to choose the relative city, confirm selection by pressing button B.

AUTOMATIC SYNCHRONISATION

- TocWATCH Automatically looks to receive signal at 3:00AM, 4:00AM and 5:00AM every day, If it is successfully receives signal in previous attempt further attempts will be stopped.
- If no signal is received after 3 attempts TocWATCH will continue to display the time via its quartz processer.
- A manual synchronisation will be required.

MANUAL SYNCHRONISATION

- When displaying the time, hold button C for 5 seconds, "REC" will appear and the following symbol "✶" will begin flash.
- Place the watch close to a window and away from electrical equipment.
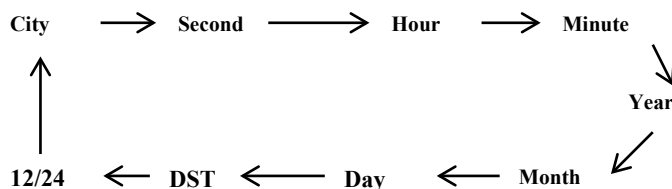

- This Symbol means strong signal is being received.
- Synchronisation can take as long as 4 minutes. Once synchronisation has been successful the tower symbol; ✶ will be displayed at the top right.
- If synchronisation fails, relocate the watch and try again.

CHECK SYNCHRONISATION

The tower symbol "✶" will be displayed at the top right of on the LCD screen if synchronisation was successful. Press button C once to view the time and date of the latest synchronisation ("GET" will be displayed along with the date and time of latest synchronisation).
