

Second hand shows 36 seconds, Icd shows 40 seconds

If your watch isn't showing the correct time, here's a simple process to correct it. First you recalibrate the watch, then synchronise it.

## RE-CALIBRATION

(Aligning the hands)

Step 1 - Hold down the top right button for approximately 7 seconds until hands start advancing round.

Step 4 - Press the top right button momentarily to start the synchronisation. The second hand will advance round 1 minute. The $\stackrel{\vee}{\boldsymbol{*}}$ symbol will start flashing.

Step 5 - Place the watch stationary, preferably on its side, by a window away from computers, mobiles, electronic devices and any power cables.

Step 6 - The 关 symbol will appear on the watch, indicating the time signal has been received (usually takes 3-4 minutes). If there is no $\underset{\text { 关 }}{ }$ symbol go to step 8.

Step 7 -The hands automatically adjust to the correct time

 receive the latest time signal.

RE-SYNCHRONISATION ( $2^{\text {nd }}$ attempt to receive the latest time signal)

Step 8 - Hold down the bottom right button for approximately 3 seconds until the second hand advances to 00 seconds. The $\stackrel{v}{*}$ symbol

Step 10 - The $\underset{\text { 关 symbol will }}{ }$ appear on the watch, indicating the time signal has been received (usually takes 3-4 minutes).

Step 9 - Place the watch stationary, preferably on its side, by a window away from computers, mobiles, electronic devices and any power cables.

Step 11- The hands automatically adjust to the correct time
 You will need to find an area of better reception. For the technically minded, the UK time signal is long wave and transmitted from North Cumbria, at 60 KHZ.

To get the best reception:

- Keep watch stationary
- Position by a window, with a clear outside view avoiding building obstruction, metal structures and power cables
- Place watch on its side
- Keep away from electrical devices especially computers, mobiles, tv's, satellite/cable boxes, kitchen equipment.
- Keep away from electrical lights and light dimmer switches
