Backpacks & Bags

50630

Fire Decontamination Bag

Safely Store Contaminants

Transports contaminated kit safely, before it is washed.

Key Features

Nylon with TPU

CLEAN / USED Identifier

Welded seams

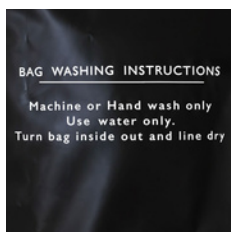

Machine washable

Airtight design

Multiple carry handles

DETAILED

Durable nylon with a Thermoplastic Polyurethane (TPU) lamination provides resistance to high impact, weather, UV radiation and washing chemicals.

Ultrasonic welded seams create a strong and airtight seal.

Easily identify clean and dirty contents with the CLEAN / USED signal.

Wash the Decon Bag along with the contaminated kit either by hand or machine.

Follow the roll indicator for an airtight seal.

Multiple carry handles allow for two-person lift.
