TocLITE® Signalling Torch
Instructions
Product code 8263

The TocLITE® Signalling Torch has white, red and green lights for signalling, plus an emergency headlamp function. It comes with six x AA Duracell batteries, three for immediate use and three for back up. There is also a low-level battery indicator.

IMPORTANT - Users are instructed to always use the torch in accordance with the relevant regulations and working practices.

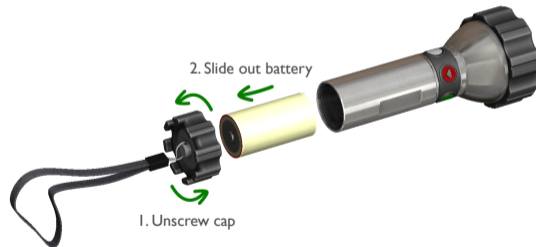

Functions

-  **White light** – Press the white button once to switch on, and once for off.
-  **Red light** – Press the red button once to switch on, and once for off.
-  **Green light** – With the red light already on, press and hold the green button to switch on, release the button to switch off, the light will then revert to red.
-  **Headlamp** (only to be used with TocLITE® bullet attachment) – Press the white button three times, in quick succession to switch on, and once for off.

Changing batteries

The low level battery indicator shows once there is a minimum of four hours battery life remaining. Unscrew the screw cap anti-clockwise, removing the battery carriage to replace the old batteries with new. Insert each new battery '+' to '+'. Reload the battery carriage, with the arrow marking pointing inwards. If inserted incorrectly battery damage will occur. Please dispose of batteries responsibly, in accordance with Local Authority regulations. After changing batteries, please check all torch functions to ensure the torch is operating correctly.

Warning

Do not shine the light directly in someone's eyes. If the light beam does shine directly in your eyes, look away immediately.
